## **TROOPER ALERT... BACKGROUND BRIEFING...TROOPER ALERT**

Goosey green gastropods from beyond the stars have discovered the human race! And they're so disgusted by our bones and bad habits that they've declared total war! Lured by a sly military recruiter, you sign a simple contract, and the next thing you know you're a 21-Star General in the Big Sky Troopers, off on a loony adventure to save the world from the Sultan of Slime and his alien armada.

There are two obstacles on the road to glory; first, it turns out you're the only one brave (or dumb) enough to volunteer for duty, and second, the Slugs have sabotaged the ancient machinery that operates reality. So... even with a star-hopping battle cruiser to carry you into action, a deadly laser gun to wield, and a computer sidekick named FIDO to keep you out of trouble, you can't simply out-fight the enemy -- you must also solve the mystery of the universe if you hope to lead Earth's forces to victory.

# STARTING THE GAME

1. Turn off your Super Nintendo Entertainment System by sliding the POWER bar away from the Game Pak slot. Plug a game controller into your system.
2. Insert the *Big Sky Trooper* Game Pak, label facing front, in the system slot.
3. Turn on the system by sliding the POWER bar toward the system slot.
4. When the Title screen appears, press the START Button to begin play.
5. Choose your character (male or female) with the A or START button.
6. If you have previously saved a game, you may restore this game by choosing the BST Combat Suit icon in the middle, then selecting the saved game you wish to play.

# NAMES OF CONTROLLER PARTS

This manual refers to the following directions:

# BUTTON CONTROLS

A button- pick up items, activate switches, talk to characters, arrange suit modules, fire rocket thrusters (in space battle)- it's an all purpose "DO" command

B button- fire standard weapons, speed through most text and animation displays, back out of display modes

X button- use combat suit module powerups (after configuring them in the inventory screen)

Y button- Use selected inventory item

# SHIP OPERATIONS

## USING THE VIEWSCREEN

Walk up to your ship's viewscreen and press the A button. FIDO will appear. Select the display mode you want with your control pad, then press A again.

### TALK TO FIDO

You can ask FIDO about items in your inventory. FIDO has lots of useful hints and information. It's **IMPORTANT** to ask him about any new item you collect.

# SHIP OPERATIONS

## GO TO SKYWAY MAP

Use this map to travel around the Big Sky Galaxy. Move the cursor to a destination planet. If the cursor flashes GREEN, you can go there by pressing the A button. If the cursor flashes RED, the planet is out of range, and you need to install a Cosmic Transport Relay.

- You can travel to ANY planet that already has a relay. Double green cursors reveal their presence on the map.
- If the planet you're on has a Relay, you can travel to any ADJACENT planet, whether it has a Relay or not. But you can't reach distant planets that don't have them. The RED cursor shows which planets are off limits.

## GO TO VIEWPORT

The Viewport shows the planet or space station that the Dire Wolf (your spaceship) is currently orbiting. You can deploy or retrieve Cosmic Transport Relays by pressing the A button.

# SHIP OPERATIONS

## MISSION ORDERS

FIDO hands out new mission orders (and a promotion!) every time you complete a mission. Keep focused on your next objective and you can't go wrong!

## BEAMING DOWN

During the game you will need to beam down to planets and space stations to pick up items or defeat occupying slugs. To do this, stand in the middle of the AIRLOCK and press the A button.

# SHIP OPERATIONS

## SAVING GAMES

To save your game, move your character to one of the four SLEEP CHAMBERS on your ship and press the A button. The numbers on the sleep chambers correspond to the save game numbers at the beginning of the game.

## BATTLE SCREEN

When you arrive at a planet occupied by Slugs, you must defeat their space patrols, or be forced to retreat to your previous location. Use the A button to fire rocket thrusters and the B button to fire torpedoes. As you progress through the game you will receive spaceship powerups. Give them to FIDO to install. Two of the powerups are special weapons. Launch and explode SPACE MINES by pressing and releasing the Y button. Launch and explode QUARK TORPEDOES by pressing and releasing the X button.

## TROOPER ALERT...STRATEGY TIPS

1. Sergeant Slack hangs out at the space station in the center of the Galaxy where you start the game. Once you make friends with him, go to see him as soon as you get a promotion, and he'll upgrade the armor on your Combat Suit.

2. Cosmic Transport Relays are your key to fast travel around the Galaxy. Place them on or near key planets and you'll navigate the spaceways with ease.

3. Slugs hate Fast Food. Slugs often reconquer a planet once you've left it, but once you establish a Fast Food Franchise on a planet (look for the double-F marks!), they'll never go near it again.

## TROOPER ALERT...STRATEGY TIPS

4. Look for cliffs and walls that can be blasted with Star Fuel Drums. Valuable items may be on the other side.

5. Be on the lookout for mailboxes. They contain info from a fellow secret agent that will help your mission.

6. Listen to the SPIRIT of the planet when you see one. Do what they ask, and they will give you a valuable treasure from their planet.

# ITEMS

Here are a few basic items that you will encounter during your adventure.

**HEALTH FRUITS** (Neenapods)- Use with the First Aid Station onboard the Dire Wolf to restore your health.

**FIDO UPLINK**- Use this to have FIDO beam you back to the Dire Wolf from planets and dungeons.

**NEON SIGN**- Slugs hate advertising! They lose two eyes when they touch these signs.

# ITEMS

**LUCKY CHARM-** Use these to trade for other goods.

**ANCIENT ARTIFACT-** Use these to trade for other goods.

**SLUG TRADING CARDS-** Use these to trade for other goods. These are especially valuable on the Slug Flagship.

**STATUS STAR-** This tells your rank.
